

ENVIRONMENTAL POLICY

GAT Energy Specialist Air Conditioning Ltd are specialists in the design, installation and commissioning air conditioning systems covering a wide spectrum of applications specifically for the commercial and industrial market.

The company recognises its responsibility to protect the environment and is committed to legal compliance, continual improvement and prevention of pollution and has in place the following policy that:

- Recognises relevant legislation, regulations and government guidance.
- Wherever possible meets the industries relevant codes of practice.
- Ensures the policy is read and understood by all employees.
- Minimises waste and conserves energy and natural resources.
- Seeks to reduce waste created as part of the work process.
- Seeks to use the most environmentally efficient methods of transport.
- Whenever required, uses registered waste disposal companies or licensed tips for the disposal of waste, particularly hazardous materials.
- Maintains clean and tidy work sites to ensure minimum inconvenience to clients.
- Makes known the contents of this policy to all subcontractors and suppliers.
